#### **LIST OF FIGURES**

Figure 1.1-1 Share of number of new registrations of pesticide formulations in China by category, 2015 VS 2016

## 1. Introduction

The number of new registrations of pesticide formulations has XXX in China these years. In 2016, fungicide formulations were registered the most among all pesticide formulations in China. Although the number of new registrations of both herbicide and insecticide formulations in China XXX in 2016 compared with that in 2015, the share of them still XXX.

CCM has done deep researches on new registrations of pesticide formulations in China in 2016 based on data from ICAMA. The report mainly includes:

- ✓ Number of new registrations of herbicide/insecticide/fungicide formulations in China by type of formulation, 2016
- ✓ Number of new registrations of herbicide/insecticide/fungicide formulations held by top 30 registrants in China, 2016
- ✓ Number of new registrations of 20 most registered single herbicide/insecticide/fungicide formulations in China, 2016
- ✓ Number of new registrations of herbicide/insecticide/fungicide formulations in China by toxicity, 2016
- ✓ Number of domestic registrants newly registering pesticide formulations in China by category, 2016
- ✓ Number of new registrations of pesticide formulations held by top 30 domestic registrants in China, 2016
- ✓ Number of new registrations of pesticide formulations held by top 30 foreign registrants in China, 2016
- ✓ Number of new registrations of pesticide formulations held by top 30 foreign registrants in China by category, 2016
- ✓ Number of new registrations of single pesticide formulations held by top 30 foreign registrants in China, 2016

## 2. Approach for this report

The report is drafted by diverse methods as follows:

- Desk research

The sources of desk research are various, including published magazines, journals, government statistics, industrial statistics, association seminars as well as information from the Internet. A lot of work has gone into the compilation and analysis of the obtained information.

- Internet

CCM contacted with players in the domestic agrochemical industry through B2B websites and software as well as obtained registration information on the internet.

- Data processing and presentation

The data collected and compiled are sourced from:

- ✓ CCM's database
- ✓ Published articles in periodicals, magazines, journals and third-party databases
- ✓ Statistics from governments and international institutes
- ✓ Telephone interviews with domestic producers, joint ventures, service suppliers and governments
- ✓ Third-party data providers
- ✓ Comments from industrial experts
- ✓ Professional databases from other sources
- ✓ Information from the internet

The data from various sources have been combined and cross-checked to make this report as precise and scientific as possible. Throughout the process, a series of internal discussions were held in order to analyze the data and draw the conclusions.

### **3. Executive summary**

In recent years, the number of new registrations of pesticide formulations has XXX in China. Although the number of new registrations of both herbicide and insecticide formulations in China XXX in 2016 compared with that in 2015, the share of them still XXX. In 2016, fungicide formulations were registered the most among all pesticide formulations in China. And most of pesticide formulations were developed with low toxicity for low pollution.

Formulation types which are easy to produce, such as SC, WP and WG, have become increasingly popular pesticide formulations in China these years.

In China, domestic registrants mainly registered herbicide, insecticide and fungicide formulations. In 2016, the number of domestic registrants newly registering herbicide, insecticide and fungicide formulations reached XXX, XXX and XXX respectively. As to those foreign registrants in China, fungicide formulations were registered the most in 2016, followed by herbicide and insecticide formulations.

### **4. What's in this report?**

***Note: Key data/information in this sample page is hidden, while in the report it is not.***

...

#### **1 Registrations of pesticide formulations in China in 2016**

##### **1.1 Analysis of 1,852 new registrations of pesticide formulations in 2016**

In 2016, the number of new registrations of pesticide formulations in China XXX to XXX from XXX in 2015, with a growth rate of XXX. Among the XXX registrations, there were XXX
