Figure 2.4-1 Prices of isopropylamine and its raw materials in China, Jan. 2010 – June 2012

As shown by the figures above, the fluctuation of ex-works price of isopropylamine is similar to the fluctuation of market price of acetone from July 2010 to June 2012. This similarity proves that the ex-works price of isopropylamine is influenced by the price of acetone to a certain extent.
