Executive Summary	1
Methodology	2
1 Number of registrations of pesticide formulations in China in 2019	3
2 New registrations of pesticide formulations in China in 2019	4
2.1 Number of new registrations of pesticide formulations by category	4
2.2 Number of new registrations of pesticide formulations by formulation type	5
2.3 Number of new registrations of pesticide formulations by toxic level	6
2.4 Number of active ingredients in new registrations of pesticide formulations	6
2.5 Main active ingredients of pesticide formulations by number of new registrations	7
2.6 Main active ingredients of single pesticide formulations by number of new registrations	8
2.7 Main active ingredients of mixed pesticide formulations by number of new registrations	9
2.8 Main registrants of pesticide formulations by number of new registrations	10
3 New registrations of herbicide formulations in China in 2019	11
3.1 Number of new registrations of herbicide formulations by formulation type	11
3.2 Number of new registrations of herbicide formulations by toxic level	11
3.3 Main active ingredients of herbicide formulations by number of new registrations	12
3.4 Main active ingredients of single herbicide formulations by number of new registrations	12
3.5 Main active ingredients of mixed herbicide formulations by number of new registrations	13
3.6 Main registrants of herbicide formulations by number of new registrations	14
4 New registrations of insecticide formulations in China in 2019	15
4.1 Number of new registrations of insecticide formulations by formulation type	15
4.2 Number of new registrations of insecticide formulations by toxic level	15
4.3 Main active ingredients of insecticide formulations by number of new registrations	16
4.4 Main active ingredients of single insecticide formulations by number of new registrations	16
4.5 Main active ingredients of mixed insecticide formulations by number of new registrations	17
4.6 Main registrants of insecticide formulations by number of new registrations	18
5 New registrations of fungicide formulations in China in 2019	19
5.1 Number of new registrations of fungicide formulations by formulation type	19
5.2 Number of new registrations of fungicide formulations by toxic level	19
5.3 Main active ingredients of fungicide formulations by number of new registrations	20
5.4 Main active ingredients of single fungicide formulations by number of new registrations	21

5.5 Main active ingredients of mixed fungicide formulations by number of new registrations	22
5.6 Main registrants of fungicide formulations by number of new registrations	22
6 First registration of active ingredients in China in 2019.....	23
6.1 Number of first registration of active ingredients by category	23
6.2 Number of first registration of active ingredients held by domestic enterprises	25
6.3 Number of first registration of active ingredients held by foreign enterprises	26
6.4 Number of first registration of fungicide active ingredients	26
6.5 Number of first registration of insecticide active ingredients.....	27
6.6 Number of first registration of herbicide active ingredients.....	27

1. Introduction

This report is about new registrations of pesticide formulations in China in 2019. This report not only shows an overview of the new registrations of pesticide formulations in China in 2019, but also introduces the new registrations of herbicide formulations, insecticide formulations and fungicide formulations in details. And this report presents those first-registration new active ingredients for pesticide formulations in China during the year.

So this report can reflect the development status of the pesticide industry in China and guide investment and business movements for the upstream players who pay close attention to the industry or try to find opportunities from it.

What's about the number of new registrations of pesticide formulations by different pesticide category? How about the number of new registrations by different toxic level? How many pesticide active ingredients were included in the new registrations of pesticide formulations? Which enterprise had the most new registrations? And how about the foreign enterprises registered in China? In this report, you will find the answers to the questions above, and to some more.

2. Approach for this report

The report is drafted by diverse methods as follows:

- Desk research

The sources of desk research are various, including published magazines, journals, government websites and statistics, industrial statistics, association seminars as well as information from the Internet. A lot of work has gone into the compilation and analysis of the obtained information.

- Internet

CCM visited government websites and contacted with players in the domestic agrochemical industry through B2B websites and software.

- Data processing and presentation

The data collected and compiled are sourced from:

- CCM's database
- Published articles in periodicals, magazines, journals and third-party databases
- Statistics from governments and international institutes
- Telephone interviews with domestic producers, joint ventures, service suppliers and governments
- Third-party data providers
- Comments from industrial experts
- Professional databases from other sources
- Information from the internet

The data from various sources have been combined and cross-checked to make this report as precise and scientific as possible. Throughout the process, a series of internal discussions were held in order to analyse the data and draw the conclusions.

3. Executive summary

According to data released by the Institute for the Control of Agrochemicals, Ministry of Agriculture and Rural Affairs of the People's Republic of China (ICAMA) as of 31 Dec., 20XX, there were XXX new registrations and XXX renewed registrations of pesticide formulations in China in 20XX.

Among the XXX new registrations, herbicide, fungicide and insecticide formulations took the top three, accounting for XXX%, XXX% and XXX% respectively. In terms of pesticide formulation type, suspension concentrate, soluble concentrate and oil dispersion were the top three frequently registered types. As for the active ingredients, in 2020, there were XXX kinds of active ingredients in the new registrations of herbicide, fungicide and insecticide formulations in total and XXX, XXX, XXX and XXX were the top four registered active ingredients. What's more, Jiangsu Gongcheng Bio-tech Co., Ltd., Jiangxi Zhongxun Agro-Chemical Co., Ltd. and Hunan Agricultural University Heartale Agrochem Co., Ltd. were the top three registrants of pesticide formulations by number of new registrations.

It's worth noting that there were XXX kinds of different active ingredients approved first registration in China in 20XX, obtaining XXX registration certificates in total. Thereinto, XXX registrations were fungicide formulations, XXX for insecticides, and XXX for herbicide.

4. What's in this report?

Note: Key data/information in this sample page is hidden, while in the report it is not.
