## 1 Export situation of fluorite

- China is the largest producer and exporter of fluorite (content > 97%) in the world. With the export restriction from Chinese government, China's export volume of fluorite (content > 97%) witnessed a decline trend, and compared to 2005, the export volume reduces by xx% in 2010.

## 2 Import and export situation of hydrogen fluoride

- China is one of the largest hydrogen fluoride exporters in the world. From 2005 to 2010, China's hydrogen fluoride export witnessed a rapid increase except 2009. Compared to export volume, China's import volume is smaller, but the price of imported hydrogen fluoride is far more expensive than exported hydrogen fluoride, because most imported hydrogen fluorides are high purity hydrogen fluorides which belong to high-end products.
