1 Profile of active producers of aniline

1.1 XX Co., Ltd.

1) Company background

In Oct. 2008, XX Co., Ltd. launched its aniline production line in Shanghai, with capacity of XXt/a, served as supporting facility of MDI production (XXt/a). Since then, XX has been the largest aniline producer by capacity at present in China.

In Dec. 2010, according to the latest news, XX announces that it will expand its MDI capacity to XXt/a in 2016 from current XXt/a in China. To meet its MDI demand, it is estimated that XX will expand the capacity of aniline and nitrobenzene too, at least to XXt/a and XXt/a respectively from 2011 to 2016.

2) Products

Now, the products of XX mainly include: Polyurethane, MDI (350,000t/a), aniline (XXt/a), nitrobenzene: XXt/a, polycarbonate

3) Situation in 2009 and 2010

As of Oct. 2010, the capacity of aniline and nitrobenzene have reached XXt/a and XXt/a respectively in XX. All nitrobenzene it produces is used in aniline production.

1.2 XX Co., Ltd.

1) Company background

In recent years, by depending on Sinopec Group, XX has thoroughly implemented many strategies, such as.....

2) Products

In 2003, XXI carried out reformation to its nitrochlorobenzene equipment in order to enlarge the production and form the production capacity of XXt/a.

3) Situation in 2007

- Aniline

Its former, XX production capacity of aniline was XXt/a in 1995 and XXt/a in 1996. Its capacity

increased to XXt/a in 1997 and the output this year was XX tonnes. The capacity kept unchanged from 1997 to 2002. The output of aniline was XXtonnes in 2000 and the plant self-consumed XX tonnes. In 2001, XX captured XX% of market shares in China.

4) Situation in 2009 and 2010

- Aniline

In May 2010, XX succeeds in the capacity expansion of aniline, from 160,000t/a in 2009 to current XXt/a. Now, XX is the second largest aniline producers in capacity in China, only next to XX.

As of Oct. 2010, the capacity of nitrobenzene is XXt/a in XX.

1.3 XX Co., Ltd.

1) Company background

As of Oct. 2010, XX is the third largest aniline producer in capacity in China.....

2) Products structure

Now, Jilin Connell mainly produces aniline and its related products:

Aniline: XX t/a

Nitrobenzene: XX t/a

Ammonia: 120,000 t/a

Nitric acid:XX t/a

Liquid nitrogen

Oxygen

3) Situation in 2009 and 2010

- Aniline

As of Oct. 2010, the capacity of aniline is XXt/a in XX.

2 Introduction to stopped aniline producers

2.1 XX Co., Ltd.

In October 2006, the company launched a XXt/a aniline project, of which the actual output reached XXt/a in 2006.

XX has stopped its aniline production forever since the beginning of 2010 due to lack of raw materials, especially for hydrogen.

2.2 XX Co., Ltd.

In 1989, XX's production capacity of aniline was XX tonnes. The capacity kept unchanged till 2002.

In 2000, it produced XX tonnes aniline, which was completely consumed by the company itself.

The production capacity of aniline in 2001 was XXt/a.

Up to 2007, its production capacity of aniline reached XXt/a.

XX has stopped its small aniline production (only XXt/a) forever since the beginning of 2009.

However, XX is building another 300,000t/a capacity of MDI in Ningbo in 2010 and its total MDI capacity will be up to XXt/a in 2011. To meet part raw material supply of MDI, XX is also building two new supporting facilities: one is aniline (XXt/a); another is nitrobenzene (XXt/a).
