

CCM ONLINE PLATFORM USER GUIDE

Content Overview

- Introduction to CCM Online Platform Pg. 3-5
- Industrial Database Pg. 6-35
- Company Profile Pg. 36-38
- Macro Data Map Pg. 39-47
- Complimentary Download Pg. 48-50

Why do you need CCM Online Platform for your business?

Are you in the industries of agriculture, chemical, biotechnology and food? Are you tired of spending hours and days on the internet searching for information about the Chinese market? If your answer is yes, then you need CCM Online Platform. Here are some of the few questions you may ask relating to your business that you can answer by using CCM Online Platform.

- How is the industry condition like in China everyday?
- Who are my competitors?
- Who are my consumers?
- What is the future price trend of my product?
- Who are the major suppliers and distributors?
- What is the impact of China's policy toward my industry/product?
- How do I successfully enter the Chinese market?
- What is the importing and exporting conditions of my product?
- How do I launch my product?

How to Access CCM Online Platform

First, you need to register to become an user of CCM Online Platform on CCM's website

(<http://www.cnchemicals.com/Join.aspx?site=online&btn=getfreetrial>).

Once you have registered, you can now log into your account and access it from CCM's homepage as below.

Navigate within CCM Online Platform

CCM Online Platform is formed by four major databases:

1. Industrial Database
2. Company Profile
3. Macro Data Map
4. Complimentary Download

CCM'S ONLINE PLATFORM

CCM's Online Platform focuses in China's agriculture, food, chemical and biotechnology markets. It provides clients with depth, real-time, comprehensive, and segment- industry focused information. With over 15 years of information accumulation, CCM is now introducing clients to a powerful online platform, which gives them full access to CCM's entire databases at once.

WHAT MAKES CCM'S ONLINE PLATFORM ATTRACTIVE?

Industrial Database

Let's first explore the Industrial Database. Click on the navigation bar to enter.

CCM'S ONLINE PLATFORM

CCM's Online Platform focuses in China's agriculture, food, chemical and biotechnology markets. It provides clients with in depth, real-time, comprehensive, and segment- industry focused information. With over 15 years of information accumulation, CCM is now introducing clients to a powerful online platform, which gives them full access to CCM's entire databases at once.

Four types of minor databases are included in Industrial Database. Each has its own features and uniqueness. You can read the descriptions about each database from the banners below to gain a general understanding.

- Industry**
- Agriculture
 - Crops/Farming/Woods
 - Feed and Feed additives
 - Fertilizers
 - Pesticides
 - Seeds and Seed Treatment
 - Biotechnology
 - Biomaterials
 - White Biotechnology
 - Chemicals
 - Fluorine
 - Lithium
 - Paper & Forest Chemicals
 - Petrochemicals
 - Phosphorus Chemicals
 - Titanium Dioxide/TiO2
 - Food and Feed (Ingredients)
 - Amino Acids
 - Sugar & Sweeteners
 - Vitamins & Minerals
 - Food and Feed (Products)
 - Corn Products
 - Other Products

Newsletters

Real-time industrial news covering the latest market dynamics and is updated weekly, monthly, and annually.

Market Data

Cross-verified data regarding industry conditions, companies and products.

Content Byte

Segmented information units ranging across all of CCM's focused industries. Users can customize their search by picking the most relevant information units and combine them into a complete piece.

Report

First hand research, which provides comprehensive and in-depth analysis toward segment industries.

Report

The report database contains first-hand, detailed analysis from CCM's experts across various industrial sectors. All contents are updated regularly throughout the year.

Filtering Option

The side menu bar lets you filter information by industries as well as by its published year. You can set relevant filters by checking the boxes based on your preference.

The screenshot displays the CCM website interface. On the left, a side menu bar is highlighted with a red border, containing two sections: 'Industry' and 'Data year'. The 'Industry' section lists various categories with checkboxes, including Agriculture, Biotechnology, Chemicals, and Food and Feed (Ingredients). The 'Data year' section lists years from 2011 to 2016 with the number of results for each year. The main content area shows search results for 'Production and Market of Glycine in China Edition(5)', 'Non-crop Pesticides on Forestry Segment in China Edition(2)', 'Market of Starch-based Plastics in China Edition(1)', '中国危化品政策研究 Edition(1)', 'Policies on Hazardous Chemicals in China Edition(1)', and 'Non-crop Pesticides on Forestry Segment in China Edition(1)'. Each result includes the latest update date, data year, keywords, and publisher information.

Search by Key Words

To search by key words. Simply type your key word into the search box, then click "Go" and the result will be directly reflected underneath. In this case, we use "sweetener" as an example.

The screenshot displays the CCM search interface. On the left, there is a sidebar with industry categories and their sub-items, each with a checkbox. The main content area features a search bar with the text "sweetener" and a "Go" button. Below the search bar, there are tabs for "Introduction", "Report", "Newsletters", "Market data", and "Content byte". The search results are displayed in a table with columns for "Publish time", "Relevance", and "Title". The results are paginated, showing page 1 of 66. The first four results are highlighted with yellow boxes:

- Survey of Sugar in China Edition(1)**
Latest update: 2015/12/16 Data year: 2015
Keyword: Food ingredients, Sugar, Sugar & Sweeteners
Published by CCM
- Market Survey of Isomalto-oligosaccharide, Polydextrose, Crystal Fructose in China Edition(1)**
Latest update: 2015/11/19 Data year: 2015
Keyword: Corn Products, Food products, Starch sugar
Published by CCM
- Market and Opportunity Research of Mogroside V from Luo Han Guo in China Edition(1)**
Latest update: 2015/11/02 Data year: 2015
Keyword: Agriculture, Food ingredients, Glyphosate formulations, Glyphosate technical, Herbicides, Mogroside V, PMIDA, Pesticides, Sugar & Sweeteners
Published by CCM
- Future of High Intensity Sweeteners in China Edition(4)**
Latest update: 2015/07/28 Data year: 2015

CCM Alert

Click “CCM alert” to start key word adding box. You can set up to 10 key words, allowing the system to send you information of your choice to your email.

The screenshot displays the CCM Alert interface. At the top, there is a green navigation bar with three tabs: "Company Profile", "Macro Data Map", and "Complimentary Download". Below this, a modal window titled "ccm alert" is open. The modal contains a "Tips" section stating: "You can only add up to ten keywords, the system will be set according to the keywords to recommend the latest products to your mailbox." Below the tips is a "Keywords:" input field with the example text "Ex: Glyphosate technical" and a green "Add" button. To the right of the modal, a green button labeled "ccm alert" is highlighted with a red box. Below the modal, there are search filters for "Publish time" (with a dropdown arrow), "Relevance", and "Title". The main content area shows a search result for "Agricultural Support Services" with a "Full Reports" icon and a "no data!" message.

CCM Alert

To receive information of your choice in your email, simply enter the key words as below, then click add. While typing in key words, the system will also recommend you a list of related key word phrases. You can either choose from the list or stay with your original word. You can add up to 10 key words at most. 😊

Live Chat

You can talk to our team directly through Live Chat button between Monday to Friday GTM+8 9:00am-8:00pm. You can also leave us a message during the off periods, we will get back to you as soon as we return to work.

Here is a glimpse of a report when reading online. You can pick sections in the report from the left menu bar to read through the whole report.

The screenshot displays a report interface with a left-hand navigation menu and a main content area. The navigation menu includes sections such as 'Executive summary', 'Methodology', 'Overview of glycine in China', 'Supply of glycine in China', 'Demand for glycine in China', and 'Forecast on glycine in China, 2016-2020'. The main content area shows text from the report, with several redacted sections indicated by yellow boxes.

Four grades of glycine are produced in China, namely tech-grade, food-grade, feed-grade and pharmaceutical-grade. Among them, tech-grade glycine has kept the dominate role, and less than [redacted] of tech-grade glycine was consumed to produce other three grades of glycine in the past six years (2010-2015).

China's glycine industry has developed fast since 2010, driven by the fast development of its key upstream product—glyphosate technical. The national capacity of tech-grade glycine increased from [redacted] t/a in 2010 to [redacted] t/a in 2015, and the national tech-grade glycine output increased from [redacted] tonnes in 2010 to [redacted] tonnes in 2015.

[redacted] Group ([redacted]) has kept being the top glycine producer in China and even in Asia with a tech-grade glycine capacity of [redacted] t/a in 2015, and this group company still has a [redacted] t/a tech-grade glycine expansion plan.

Some glyphosate producers have built up or planned to construct glycine production lines for their production of glyphosate technical.

- [redacted] glycine is firstly supplied to Hubei Trisun, one of its brother companies.
- [redacted] t/a glycine is mainly consumed by itself.
- [redacted] 10,000 t/a glycine is mainly supplied to its parent company - Zhejiang Wynca.
- [redacted] 10,000 t/a glycine is consumed by itself.

Content Byte

Content Byte are individual information units written by CCM experts by sections across CCM's entire industry coverage. What makes content byte interesting is that you are freely to choose among over hundred thousand content byte units of your choice, and in the end you can combine these pieces together to form a report of your own. Just like all other databases, content byte are constantly updated.

The screenshot displays the CCM Content Byte interface. On the left, there is a sidebar with an 'Industry' section containing various categories like Agriculture, Biotechnology, Chemicals, and Food and Feed. The main content area shows a search bar with the text 'Search in the results' and a 'Go' button. Below the search bar, there are tabs for 'Introduction', 'Report', 'Newsletters', 'Market data', and 'Content byte'. The 'Content byte' tab is active. The search results show a list of articles, with the first one being 'CN-China's methylal market in first work week of Feb. 2016 (1 Feb.-5 Feb.)'. Each article entry includes a 'Content Byte' icon, the title, the latest update date, the data year, and the keyword. A 'Publish time' dropdown menu is visible above the search results. At the bottom right, there is a 'LIVE CHAT' button with the text 'GTM+8 9:00-20:00'.

Filtering in Content Byte

Similar to the other databases, the filtering feature is very straight forward to use. You can filter content bytes by its industry coverage, types, and data year (See below).

Industry

- Agriculture
- Crops/Farming/Woods
- Feed and Feed additives
- Fertilizers
- Pesticides
- Seeds and Seed Treatment
- Biotechnology
- Biomaterials

Macro Data Map

Macro Data Map is a set of data being gathered and displayed in a visualized form of a map. It allows you to easily examine and analyze industrial dynamics, production, and consuming situations on a macro-economical scale.

CCM'S ONLINE PLATFORM

CCM's Online Platform focuses in China's agriculture, food, chemical and biotechnology in depth, real-time, comprehensive, and segment- industry focused information. With over 10 years of data accumulation, CCM is now introducing clients to a powerful online platform, which gives them access to multiple databases at once.

Agricultural Map of China (AMC)

As of now, Macro Data Map contains AMC, which is a data map created for China's agricultural industry. You may grasp a deep understanding about China's agricultural sector from various dimensions using the left menu bar.

The screenshot shows the AMC online platform interface. On the left, there is a navigation menu with the following categories: **By Nation**, **By Province**, and **By City**. Below these are several sub-categories: **Agricultural Mechanization**, **Other Agricultural Materials**, **Industrial Data**, **Farming**, **Forestry**, **Animal Husbandry**, **Fishery**, and **Trade**. The main content area features a header with 'Online Platform' and 'CCM'. Below the header, there is a description of AMC: 'Agricultural Map of China (AMC) is an online database covering the most macroscopic and comprehensive information about industry. Through annual update and visual presentation, AMC offers you the most convenient access to the panorama of industry.' This is followed by a call to action: 'If you would like to get more information or to purchase AMC and get access to more data, please subscribe or please [Contact us](#).' Below this is a video player with a red play button. The video title is 'Agricultural Map of China' and the description below it states: 'Please see the video below for a demonstration of the power and usefulness of AMC and directions how to use it.' The video player shows a bar chart with a red play button overlay. Below the video player, there is a caption: 'the country had 26 million, 784 thousand hectares of area affected by drought.'

1998	30000
1999	31000
2000	32000
2001	33000
2002	34000
2003	35000
2004	36000
2005	37000
2006	38000
2007	39000
2008	40000
2009	41000
2010	42000

Multi-dimensional Navigation

Pick the product of your choice from the left menu bar as below to generate the data map. Let's pick corn in the farming industry as an demonstration.

The screenshot displays the AMC CCM Online Platform interface. The top navigation bar includes 'Online Platform' and 'CCM'. The left sidebar features a menu with categories: 'By Nation', 'By Province', and 'By City'. Under 'By Nation', the 'Farming' category is selected and highlighted with a red box. The main content area shows a list of products under the 'Output' section, with 'Corn' selected and highlighted with a red box. The right side of the interface shows a bar chart representing the output of Corn from 1983 to 1995. The chart shows a significant increase in output starting around 1989, with a peak in 1995. The y-axis is labeled '(tonne)' and the x-axis shows the years 1983, 1986, 1989, 1992, and 1995. Below the chart, it is noted that data for years before 2005 are available for free.

Year	Output (tonne)
1983	0
1986	0
1989	~1000
1990	~1500
1991	~1500
1992	~1500
1993	~1800
1994	~1800
1995	~2200

Multi-dimensional Navigation

As you see, the corn data map is being generated. Likewise, you can use other dimensional navigation tools to analyze the product of your choice.

Turn Map into Data

You can turn the data map into pure numerical data by clicking on “Data View” on the right side of the graph.

Data Map Download

You may download the data map from the right side of the graph.

Agricultural Map of China (AMC) is an online database covering the most macroscopic and comprehensive information about China's agricultural industry. Through annual update and visual presentation, AMC offers you the most convenient access to the panorama of China's agricultural industry.

Complimentary Download

Complimentary Download gathers hot industrial news from CCM's internal and external experts. Unlike Newsletters which are segment-industry focused, Complimentary Download provides you with a broader key industrial dynamics of what is happening each day in China on a macro-economical scale.

Global Bio-Chem and Global Sweeteners cooperate with ADM

Keyword:

Publish time:6/26/2013 12:00:00 AM Source: CCM

Information collection and data processing: CCM For more information, please [contact us](#)

On June 6, 2013, Global Bio-chem Technology Group Co., Ltd. (Global Bio-chem) and Global Sweeteners Holdings Limited (Global Sweeteners) announced that they will cooperate with Archer Daniels Midland Company (ADM) for a year. After this operation, ADM will be the sole distributor of Global Bio-chem's lysine and Global Sweeteners' sweetener products in Asian and South American markets respectively. Moreover, according to this cooperation, the Global group can develop more effective technologies through the help of ADM.

In detail, according to ADM's indication, it will be the exclusive sales channel for several of Global Sweeteners' sweetener products. The marketing territory of the company will include various Southeast Asian countries, the Far East, Australia and New Zealand from June 2013. ADM maintains several regional sales offices in Asia, including those in China, India, Singapore, Japan and Australia.

Furthermore, ADM will also use its expansive marketing and sales network to distribute a variety of Global Bio-chem's lysine products to customers in South American countries such as Brazil and Argentina. As is known, lysine is a kind of amino acid commonly used by livestock producers to improve the nutritional value of animal rations. Global Bio-chem is one the world's leading lysine producers and ADM is a market leader of lysine in South America. As a result, it's beneficial for these two companies' further development.

"ADM is pleased to have the opportunity to provide many of the high-value products in Global Bio-chem's portfolio to our extensive network of customers in Asia and South America," said Ismael Roig, President of ADM Asia-Pacific. "This collaboration leverages the strengths of both companies for the benefit of customers, and we anticipate a positive response on both continents."
