

### **I-3 Summary of Current Production Situation**

#### **I-3.1 Summary of Production Situation of Camphor in 2003**

From the various sources as of Oct 2003, 46 companies have been reported to produce either synthetic camphor or natural camphor. Extensive telephone interview has been conducted to these companies. Then, on base of the information obtained we compiled the situation of each manufacturer, as presented in Chapter Two. Appendix: [Situation of Chinese Manufacturers](#).

After verification, we found that:

- ✧ 14 companies are not producing camphor at all. Some of them claimed to produce but we learnt from other source, or based on our judgment, that they are in fact selling or trading camphor. Some of them also produce other essential oils. We exclude this these companies from our present discussion.
- ✧ 2 companies have not been located.
- ✧ Of the rest companies, they belong to two categories: synthetic camphor producers and natural camphor producers.

Synthetic camphor producers:

- ✧ 8 are active in the commercial production nowadays. The majority of the following discussions are based on these companies. It is estimated that the production of synthetic camphor from 8 active manufacturers accounts to 95-98% of the total production.
- ✧ 2 are potential producers.
- ✧ 4 have stopped the productions, mainly due to the bad market or severe competition.

Natural camphor producers:

- ✧ 9 are active in the commercial production nowadays.
- ✧ 7 have stopped production for a variety of reasons.
